PROFESSIONAL SUMMARY

Data Analyst working in product data management, with hands-on experience in data validation, data cleaning, product catalog audits, inventory data comparisons, and reporting using Excel and Google Sheets. Previously worked as a frontend developer using HTML, CSS, JavaScript, Tailwind CSS, and React. Looking for entry-level Data Analyst, Product Data Analyst, or Data Quality Analyst roles.

EXPERIENCE

Data Analyst | EDatix | Lahore, Pakistan — June 2026 – Present

- Organize, clean, validate, and review product data in Excel and Google Sheets for SD Tire & Wheel operations.
- Compare product information across vendor spreadsheets, WooCommerce, and TireGuru (TG) to identify inconsistencies.
- Audit wheel product attributes (SKU, wheel size, bolt pattern, center bore, offset, finish, pricing) to find missing information, incorrect attributes, duplicate product groups, and inconsistent descriptions.
- Review product searchability by wheel size and bolt pattern in TireGuru and document products that are not searchable.
- Prepare product audit reports covering missing SKUs, attributes, images, and other catalog issues.
- Clean and prepare brand-specific spreadsheets for review and upload into TireGuru; organize product images and add image links to data sheets.
- Support pricing and inventory data checks by comparing supplier data with existing catalog information.
- Coordinate with team members to report issues, request corrections, and follow up on product data updates.

Frontend Developer Intern | CodeAlpha | Remote — March 2025 – April 2025

- Built and improved responsive UI components using HTML, CSS, and JavaScript for different devices and screen sizes.
- Gained practical experience working on frontend development tasks in a remote environment.

Frontend Developer | Zaions | Lahore, Pakistan — May 2024 – July 2024

- Developed and improved responsive layouts using HTML and CSS for different screen sizes.
- Assisted with refining UI components, page structure, and visual consistency.
